1976-77  Sir Rudolph Peierls, Oxford University
          Jan. 31  “Pseudomomentum in the Theory of Condensed Matter”
          Feb. 1  “The Momentum of Light in a Refractive Medium”
          Feb. 4  “Recollections of the Early Days of Quantum Mechanics”
          Public Feb. 7  “The Arms Race - Is There Still Hope for the World?”
          Feb. 9  “Decaying States and Their Uses”

1977-78  Robert Wilson, Fermi National Accelerator Lab
          Oct. 17  “The Tevatron, a 1000 GEV Colliding Beam Accelerator”
          Public Oct. 25  “A Physicist Blunders into Architecture”
          Oct. 27  “The Humanness of Physics”
          Oct. 28  “A World Laboratory of Nuclear Studies”

1978-79  Robert H. Dicke, Princeton University (1 week)
          Public Nov. 13  “Cosmology, Paradoxes and Palliatives”
          Nov. 14  “Observational Foundation of General Relativity”
          Nov. 16  “What in the World’s Going on in our Sun?”

Steven Weinberg, Harvard University (1 week)
          Public Apr. 29  “The Search for Symmetry”
          Apr. 30  “Toward a Unified Theory of All Interactions”
          May 1  “Aspects of Grand Unification”

1979-80  Anthony J. Leggett, University of Sussex
          Mar. 31  “Quantum Mechanics & ‘Common Sense’ - Problems, Paradoxes, Alternatives”
          Public Apr. 2  “Superfluidity: Order from Chaos”
          Apr. 3  “Quantum Liquids”, part one
          Apr. 8  “Quantum Liquids”, part two
          Apr. 10 “Quantum Liquids”, part three
          Apr. 15 “Quantum Liquids”, part four
          Apr. 17 “Macroscopic Tunneling in SQUIDs”

1980-81  Freeman J. Dyson, Institute for Advanced Study, Princeton
          Series Title: “Implications of Science...
          Public Nov. 4  ...for Technology: Quick is Beautiful”
          Public Nov. 6  ...for Weaponry: The Quest for Concept”
          Public Nov. 10  ...for Philosophy: Manchester and Athens”
          Nov. 12  ...for Eschatology: Life in the Universe”
          Nov. 14  ...for the Environment: CO₂ in the Atmosphere”

1981-82  Norman F. Ramsey, Harvard University
          Apr. 5  “Molecular Beam Resonance Methods”
          Apr. 6  “Nuclear Interactions in Molecules”
          Public Apr. 7  “Inner Space: Physics at Short Distances”
          Apr. 12 “Dipole Moments and Parity Violating Spin Rotations of the Neutron”
          Apr. 13 “Atomic Hydrogen Maser”

          Nov. 1  “Status and Future of High Energy Physics”
          Public Nov. 3  “Inner Space and Outer Space”
          Public Mar. 23 “Basic Research for Culture and Profit”
          Mar. 24 “The New Accelerators”
