

## CURRICULUM VITAE OF YURI ORLOV

- 1924 Born 13 August.
- 1947 Graduated from high school after 6-year interruption for war service, mostly as factory worker making T-34 tanks, then as artillery officer in Red Army.
- 1952 Graduated from Physical-Technical Institute; student of Kapitsa, Landau, Budker, Berestetsky.
- 1953-56 Research, Theoretical Department, ITEP, Moscow. Worked on design of ITEP proton-synchrotron, developing theory of non-linear betatron oscillations and betatron and synchro-betatron resonances. First time Hamiltonian approach was used in this area.
- 1956 Fired by order of Politburo after pro-democracy speech at ITEP. Ph.D defense and publication blocked for 2 1/2 years, and a job in Moscow for 16 yrs.
- 1958 First Ph.D, Yerevan Physics Institute, Armenia.
- 1956-72 Yerevan Physics Institute. Theoretical design of Yerevan electron-synchrotron. Published papers on quantum radiation damping and excitation, spin resonances and spin depolarization, etc. Became chief of laboratory of electro-magnetic interaction.
- 1963 Second Ph.D, Budker Institute of Nuclear Physics, Novosibirsk.
- 1963-64 Parallel work at Budker Institute, Novosibirsk.
- 1967 Proposed a 100x100 GeV electron-positron collider (an idea not accepted at the time).
- 1968 Elected Corresponding Member of Armenian Academy of Sciences (but secretly expelled after arrest, 1979).
- 1970 Professor, Yerevan Physics Institute.
- 1972 Moved back to Moscow. Forbidden to work at ITEP and Moscow University.
- 1972-73 Research, Institute of Terrestrial Magnetism and Dissemination of Radio Waves, Moscow region.
- 1973 Founding member, Soviet section of Amnesty International. Wrote "Letter to Brezhnev," a defense of Andrei Sakharov and general criticism of Soviet

regime, with demands for political and economic reforms (including glasnost). Fired, and after 1973 never had a scientific job again in the USSR.

- 1973-77 Private tutoring.
- 1976 Founded first Helsinki Watch Group, Moscow. Helped establish Lithuanian, Ukrainian and Georgian Helsinki Groups. In February, 1977 arrested by KGB.
- 1977-84 KGB prison, labor camp.
- 1984-86 Siberian exile.
- 1986 In October, stripped of USSR citizenship and deported to US.
- 1987-08 Senior Scientist, Cornell University, Newman Laboratory of Nuclear Studies.
- 1987— Member, Muon g-2 Collaboration based in Brookhaven National Laboratory and now Fermilab.
- 1988-89 Visiting scientist, CERN.
- 1993 American citizenship.
- 1998-15 Member, EDM Collaboration based in Brookhaven National Laboratory. (Consultant, 1998-2009.)
- 2008-15 Professor of Physics and Government, Cornell University.
- 2015— Professor of Physics Emeritus, Cornell University.
- 2015— Member, Juelich EDM Collaboration (JEDI).

### **Publications**

Until 1977 arrest, authored or co-authored 50+ scientific articles in leading journals and conference proceedings, and about 40 human rights documents and appeals. (Almost all documents of the Soviet Helsinki groups became official documents of the U.S. Congressional Commission on Security and Cooperation in Europe, which published them in 1986.)

While in labor camp, wrote and smuggled out 3 scientific papers and several human rights appeals, and co-authored with 5 fellow prisoners a document on the situation of prisoners and forced laborers in the USSR, all published in the West.

Since 1986 expulsion from the USSR, has authored or co-authored numerous scientific papers and technical reports and written several human rights and political articles, as well as

the autobiographical memoir Dangerous Thoughts (1991), published in the US, Russia, Germany, France and Ukraine.

### **Organizations**

Member, American Academy of Arts and Sciences

Fellow, American Physical Society

Foreign member, National Academy of Sciences of Armenia

Honorary chair, Moscow Helsinki Group

President, Friends of the Helsinki Movement Foundation

Member, Committee of 100 for Tibet

Founder and former member, Moscow Helsinki Group (current Russian law bars foreign members). Founding member, Soviet section of Amnesty International.

Former member, advisory board of Human Rights Watch/Helsinki, Human Rights Watch/Asia, Human Rights Watch Academic Freedom Committee; APS Committee on International Freedom of Scientists. Honorary chair, former International Helsinki Federation. Founding member (with Fang Lizhi, Liu Binyan and Robert Bernstein), former Committee to End the Chinese Gulag.

### **Awards**

Several honorary degrees (including Uppsala University) and human rights awards, including the Carter-Menil Human Rights Prize; the Human Rights Award of the International League of Human Rights; and the American Physical Society Nicholson Medal and Andrei Sakharov Prize.

updated 9/6/18

## YURI F. ORLOV

Professor Emeritus of Physics  
Cornell University, Ithaca, NY 14853

### PHYSICS PUBLICATIONS, REPORTS, E-PRINTS AND PROPOSALS

*Russian works that have not been translated into English are preceded by an asterisk; translations of the titles are in square brackets. Muon (g-2) Collaboration and EDM Collaboration publications are a selection.*

#### Publications

##### 2018

151. with G. Guidoboni *et al.* (JEDI Collaboration), Connection between zero chromaticity and long in-plane polarization lifetime in a magnetic storage ring. Phys. Rev. Accel. Beams **21**, 024201 (2018).

##### 2016

150. with V. Anastassopoulos *et al.* A Storage Ring Experiment to Detect a Proton Electric Dipole Moment. Rev. Sci. Instrum. **87**, 115116 (2016).

149. with G. Guidoboni *et al.* (JEDI Collaboration), How to reach a thousand-second in-plane polarization lifetime with 0.97–GeV/c deuterons in a storage ring. Phys. Rev. Lett. **117**, 054801 (2016).

##### 2015

148. with E. M. Metodiev *et al.*, Analytical Benchmarks for Precision Particle Tracking in Electric and Magnetic Rings. Nucl. Instr. Meth. **A797**, 311-318 (2015).

##### 2013

147. William M. Morse, Yuri F. Orlov and Yannis K. Semertzidis, rf Wien filter in an electric dipole moment storage ring: The "partially frozen spin" effect. Phys. Rev. ST Accel. Beams **16**, 114001 (2013).

##### 2012

146. Yuri Orlov, Eanna Flanagan and Yannis Semertzidis, Spin rotation by Earth's gravitational field in a "frozen-spin" ring. Phys. Lett. **A376**, No. 45, 2822-2829 (2012).

2010

145. Yuri F. Orlov, "Robinson's Sum Rule" Revisited. *Phys. Rev. ST Accel. Beams* **13**, 024901 (2010).

2009

144. with F. Lin *et al.*, Study by spin tracking of a storage ring for deuteron electric dipole momentum. In D.G. Crabb *et al.*, eds., *Proceedings of the 18th annual spin physics symposium (SPIN 2008), Charlottesville, VA., 6-11 October 2008*. AIP Conf. Proc. **1149**, 777-780 (2009).

143. with F. Lin *et al.*, Overview of (some) computational approaches in spin studies. *Proceedings of the 10th International Computational Accelerator Physics Conference (ICAP09)*, San Francisco, CA, 31 August-4 September, 2009.  
<http://epaper.kek.jp/ICAP2009/papers/mo4iopk04.pdf>

142. with G.W. Bennett *et al.* (Muon g-2 Collaboration), An improved limit on the muon electric dipole moment. *Phys. Rev. D* **80**, 052008, 1-18 (2009).

2008

141. with G.W. Bennett *et al.* (Muon g-2 Collaboration), Search for Lorentz and CPT violation effects in muon spin precession. *Phys. Rev. Lett.* **100**, 091602 (2008).

140. Yuri F. Orlov, A method to remove synchrotron frequency from the spectrum of momentum-forced radial oscillations. *Nucl. Instr. Meth.* **A587**, 1-6 (2008).

2007

139. with G.W. Bennett *et al.* (Muon g-2 Collaboration), Statistical equations and methods applied to the precision muon (g-2) experiment at BNL. *Nucl. Instr. Meth.* **A579**, 1096-1116 (2007).

2006

138. Yuri F. Orlov, Spin resonance conditions for intrinsic and induced electric dipole moments of a spin-1 particle. *Phys. Lett.* **A357**, No. 2, 120-124 (2006).

137. Yuri F. Orlov, William M. Morse and Yannis K. Semertzidis, Resonance method of electric-dipole-moment measurements in storage rings. *Phys. Rev. Lett.* **96**, 214802 (2006).

136. with G.W. Bennett *et al.* (Muon g-2 Collaboration), Final report of the muon E821 anomalous magnetic moment measurement at BNL. *Phys. Rev. D* **73**, 072003 (2006).

2005

135. Yuri F. Orlov (for the Storage Ring EDM Collaboration), Resonance method of EDM measurements in storage rings. In D. Chiladze, A. Kacharava, H. Stroeher, eds., *Proceedings of STORI '05. 6th International Conference on Nuclear Physics at Storage Rings, Jülich-Bonn, Germany, 23-26 May 2005*. Schriften des Forschungszentrums Jülich: Materie und Material **30**, 223-226 (2005).

2004

134. with G.W. Bennett *et al.* (Muon g-2 Collaboration), Measurement of the negative muon anomalous magnetic moment to 0.7 ppm. *Phys. Rev. Lett.* **92**, 161802 (2004).

133. F.J.M. Farley, K. Jungmann, J. P. Miller, W.M. Morse, Y.F. Orlov, Y.K. Semertzidis, A. Silenko, and E. J. Stephenson, A new method of measuring electric dipole moments in storage rings. *Phys. Rev. Lett.* **93**, 052001 (2004).

132. with P. Shagin *et al.* (E821 Collaboration), Recent results of muon g-2 Collaboration. 32nd SLAC Summer Institute on Particle Physics (SSI 2004): Nature's Greatest Puzzles, Menlo Park, CA, 2-13 August 2004. eConfCO40802:TUT007 (2004).

131. with J.P. Miller *et al.* (EDM Collaboration), A new experiment to measure the muon electric dipole moment. In *Intersections of Particle and Nuclear Physics. Proceedings of the 8th Conference on the Intersections of Particle and Nuclear Physics (CIPANP 2003), New York, New York, 19-24 May 2003* (New York, 2003), pp. 196-199. *AIP Conf. Proc.* **698**, 196-199 (2004).

130. with Y.K. Semertzidis *et al.* (EDM Collaboration), A new method for a sensitive deuteron EDM experiment. In *Intersections of Particle and Nuclear Physics. Proceedings of the 8th Conference on the Intersections of Particle and Nuclear Physics (CIPANP 2003), New York, New York, 19-24 May 2003* (New York, 2003), pp. 200-204. *AIP Conf. Proc.* **698**, 200-204 (2004).

2003

129. Yuri F. Orlov, Quantumlike computation and "thinking" based on classical oscillators. In *Technical Proceedings of the NSTI Nanotechnology Conference and Trade Show, San Francisco, CA, 24-26 February 2003* (NSTI, CD-ROM), Vol. 1, Ch. 5.

128. with Y.K. Semertzidis *et al.*, The Brookhaven muon (g-2) storage ring high voltage quadrupoles. *Nucl. Instr. Meth.* **A503**, 458-484 (2003).

127. with Y.K. Semertzidis *et al.* (Muon g-2 Collaboration), Measurement of the muon anomalous magnetic moment to 0.7 ppm. *Nucl. Phys. B Proc. Suppl.* **117**, 373-384 (2003).

126. with David W. Hertzog *et al.* (Muon g-2 Collaboration), The muon anomalous magnetic moment and the standard model. *Nucl. Phys.* **A721**, 161-170 (2003). [Presented at the 16th International Conference on Particles and Nuclei (PANIC 02), Osaka, Japan, 30 September-4 October 2002.]

125. with E.P. Sichtermann *et al.* (Muon g-2 Collaboration), New results from the muon g-2 experiment. In Y.I. Makdisi *et al.*, eds., *Spin 2002: Proceedings of the 15th international spin physics symposium, Upton, NY, 9-14 September 2002*, AIP Conf. Proc. **675**, 13-22 (2003).

124. with B.L. Roberts *et al.* (Muon g-2 Collaboration), Measurement of the muon (g-2) value. *Proceedings of the 7th International Workshop on Tau Lepton Physics*, Santa Cruz, CA, 10-13 September 2002. Nucl. Phys. B (Proc. Suppl.) **123**, 214-218 (2003).

123. with M. Deile *et al.* (Muon g-2 Collaboration), News from the muon (g-2) experiment at BNL. In *Application of Quantum Field Theory to Phenomenology. Proceedings of 6th International Symposium on Radiative Corrections: Application of Quantum Field Theory to Phenomenology (RADCOR 2002) and 6th Zeuthen Workshop on Elementary Particle Theory (Loops and Legs in Quantum Field Theory), Kloster Banz, Germany, 8-13 September 2002* (Staffelstein, 2002), pp. 215-219. Nucl. Phys. B Proc. Suppl. **116**, 215-219 (2003).

## 2002

122. Yuri F. Orlov, Quantumlike bits and logic gates based on classical oscillators. Phys. Rev. **A66**, 052324 (2002).

121. Yuri F. Orlov, Classical counterexamples to Bell's inequalities, Phys. Rev. **A65**, 042106, 1-7 (2002)

120. Yuri Orlov, Cenap S. Ozben and Yannis K. Semertzidis, Muon revolution frequency distribution from a partial-time Fourier transform of the g-2 signal in the muon g-2 experiment. Nucl. Instr. Meth. **A482**, 767-775 (2002).

119. with G.W. Bennett *et al.* (Muon g-2 Collaboration), Measurement of the positive muon anomalous magnetic moment to 0.7 ppm. Phys. Rev. Lett. **89**, 101804 (2002).

118. with S. Redin *et al.* (Muon g-2 Collaboration). Recent results and current status of the muon g-2 experiment at BNL. Can. J. Phys. **80**, 1355-1364 (2002).

117. with C. S. Ozben *et al.* (Muon g-2 Collaboration), Precision measurement of the anomalous magnetic moment of the muon. In *Proceedings of the 30th SLAC Summer Institute on Particle Physics: Secrets of the B Meson (SSI 2002), SLAC, Menlo Park, CA, 5-16 August 2002*, pp. 464-479.

116. with M. Deile *et al.* (Muon g-2 Collaboration), Testing CPT and Lorentz invariance with the anomalous spin precession of the muon. In *Proceedings of the Second Meeting on CPT and Lorentz Symmetry, Bloomington, Indiana, 15-18 August 2001* (World Scientific, 2002). arXiv:hep-ex/0110044v1.

115. with J.P. Miller *et al.* (Muon g-2 Collaboration), The muon anomaly: experiment and theory. In J. Lee-Franzoni, F. Bossi, and P. Franzini, eds., *Lepton and Photon Interactions at High Energies. Proceedings of the 20th International Symposium on Lepton and Photon Interactions at High Energies (LP 01), Rome, Italy, 23-28 July 2001* (World Scientific, Singapore, 2002), pp. 408-425 and Int. J. Mod. Phys. **A17**, 3318-3335 (2002).

114. with P.T. Debevec *et al.* (Muon g-2 Collaboration), Recent results from the BNL g-2 experiment. Nucl. Phys. B Proc. Suppl. **111**, 200-205 (2002).

113. with V.W. Hughes *et al.* (Muon g-2 Collaboration), Muon g-2 experiment at Brookhaven National Laboratory. Nucl. Phys. B Proc. Suppl. **105**, 156-159 (2002).

112. with E.P. Sichtermann *et al.* (Muon g-2 Collaboration), Precision measurement of the muon anomalous magnetic moment. In *Cosmology and Elementary Particle Physics* (Fort Lauderdale, 2001), pp. 210-219. AIP Conf. Proc. **624**, 210-219 (2002).

111. with I.B. Logashenko *et al.* (Muon g-2 Collaboration), Results from the muon g-2 experiment. In *Supersymmetry and Unification of Fundamental interactions. Proceedings of the 9th International Conference on Supersymmetry and Unification of Fundamental Interactions (SUSY01), Dubna, Russia, 11-17 June 2001* (World Scientific, 2002), pp. 3-11.

## 2001

110. Yuri F. Orlov, Snapshots from the 1950's. In M. Shifman, ed., *At the frontier of particle physics: Handbook of QCD. Boris Ioffe Festschrift*, vol. 1 (World Scientific, 2001), pp. 65-78.

109. with V.W. Hughes *et al.* (Muon g-2 Collaboration), The muon anomalous magnetic moment. In E. Arimondo *et al.*, eds., *Atomic Physics 17: XVII International Conference on Atomic Physics (ICAP 2000) Florence, Italy, 4-9 June, 2000*. AIP Conf. Proc. **551**, 221-237 (2001).

108. with G.T. Danby *et al.* (Muon g-2 Collaboration), The Brookhaven muon storage ring magnet. Nucl. Instr. Meth. **A457** (2001) 151-174.

107. with H.N. Brown *et al.* (Muon g-2 Collaboration), Precise measurement of the positive muon anomalous magnetic moment, Phys. Rev. Lett. **86**, 2227-2231 (12 March 2001).

106. with H.N. Brown *et al.* (Muon g-2 Collaboration), A precise measurement of the anomalous magnetic moment of the muon. In T. Ohshima and A.I. Sanda, eds., *Proceedings of the 4th International Workshop on B Physics and CP Violation (BCP4), Ise-Shima, Japan, 19-23 February 2001* (World Scientific, 2001), pp. 48-53.

105. with O. Rind *et al.*, (Muon g-2 Collaboration), Precision measurement of muon g-2 at BNL. In *Proceedings of the 2001 e+e- Physics at Intermediate Energies Workshop, Stanford, California, 30 April-2 May 2001* (Stanford, 2001), pp. 9-15. arXiv:hep-ex/0106101v1.

104. with B. Lee Roberts *et al.* (Muon g-2 Collaboration), Recent progress on the BNL muon (g-2) experiment. In F. Costantini, G. Isidori and M. Sozzi, eds., *Proceedings of KAON 2001: International Conference on CP Violation, Pisa, Italy 12-17 June 2001*, Frascati Physics Series, Vol. 26 (Istituto Naz. Fis. Nucl., Frascati, Italy, 2001).

103. with C.S. Ozben *et al.* (Muon g-2 Collaboration), Muon g-2 experiment at Brookhaven National Laboratory. Int. J. Mod. Phys. **A16**, Suppl. 1A, 287-291 (2001); *Proceedings of XXI*

- Physics in Collision Conference, Seoul, Korea, 28-30 June, 2001* (Seoul, 2001); *Proceedings of the Workshop on the Spin Structure of the Proton and Polarized Collider Physics, Trento, Italy, 23-28 July 2001* (Trento, 2001), pp. 156-159.
102. with I. Logashenko *et al.* (Muon g-2 Collaboration), A new precise measurement of g-2 of muon. In *High Energy Physics. Proceedings of the International Europhysics Conference on High-Energy Physics (HEP 2001), Budapest, Hungary, 12-18 July 2001* (Budapest, 2001), p. 108.
101. with H.N. Brown *et al.* (Muon g-2 Collaboration), Precision measurement of muon g-2 and accelerator related issues. In *2nd Asian Particle Accelerator Conference. Proceedings of the 2nd Asian Particle Accelerator Conference, Beijing, China, 17-21 September 2001* (Institute of High Energy Physics, Beijing, 2001), pp. 862-866.
100. with P.T. Debevec *et al.* (Muon-2 Collaboration), Recent results from the BNL g-2 experiment. In *Frontiers in Flavor Physics, Proceedings of the 5th KEK Topical Conference: Frontiers in Flavor Physics (KEKTC5) Tsukuba, Ibaraki, Japan, 20-22 November 2001* (Tsukuba, 2001), pp. 200-205. S. Hashimoto and T.K. Komatsubara, eds., *Frontiers in Flavor Physics, Proceedings of the 5th KEK Topical Conference: Frontiers in Flavor Physics (KEKTC5) Tsukuba, Ibaraki, Japan, 20-22 November 2001* (Amsterdam: North-Holland, 2002), pp. 200-205. Nucl. Phys. Proc. Suppl. **111**, 200-205 (2002).
99. with Y.K. Semertzidis *et al.* (EDM Collaboration), Sensitive search for a permanent muon electric dipole moment. In Y. Kuno and T. Yokoi, eds., *Proceedings of the International Workshop on High Intensity Muon Sources. KEK, Japan, 1-4 December 1999* (World Scientific, Singapore, 2001), pp. 81-97. arXiv:hep-ph/0012087v1.
98. with Y.K. Semertzidis *et al.*, A sensitive search for a muon electric dipole moment. Int. J. Mod. Phys. A**16**, Suppl. 1B, 690-693 (2001); AIP Conf. Proc. **564**, 263-268 (2001).
97. with Y.K. Semertzidis *et al.* (EDM Collaboration), A sensitive search for a muon electric dipole moment. In *Quantum Electrodynamics and Physics of the Vacuum. Proceedings of the 2nd Workshop on Frontier Tests of Quantum Electrodynamics and Physics of the Vacuum (QED 2000). Trieste, Italy, 5-11 October 2000* (Trieste, 2000), 263-268. Int. J. Mod. Phys. A**16**, Suppl. 1B, 690-694 (2001).

## 2000

96. with H.N. Brown *et al.* (Muon g-2 Collaboration), Improved measurement of the positive muon anomalous magnetic moment, Phys. Rev. D**62**, 091101 (2000).
95. with C.J.G. Onderwater *et al.* (BNL-E821 Collaboration), Recent results on the muon anomalous magnetic moment from BNL E821. In Zohreh Parsa and William J. Marciano, eds., *Intersections of Particle and Nuclear Physics. Proceedings of the 7th Conference on Intersections between Particle and Nuclear Physics (CIPANP 2000) Quebec City, Canada, 22-28 May 2000*. AIP Conf. Proc. **549**, 917-919 (2000).

94. with R. Prigl *et al.* (Muon g-2 Collaboration) Status of the BNL muon (g-2) experiment. In *Proceedings of RADCOR2000, the 5th International Symposium on Radiative Corrections, Carmel (USA), 11-15 September, 2000*. arXiv:hep-ex/0101042v1.

93. with Y.K. Semertzidis *et al.* (Muon g-2 Collaboration), The muon anomalous magnetic moment experiment at Brookhaven. In *Quantum Electrodynamics and Physics of the Vacuum. Proceedings of the 2nd Workshop on Frontier Tests of Quantum Electrodynamics and Physics of the Vacuum (QED 2000), Trieste, Italy, 5-11 October 2000* (Trieste, 2000). AIP Conf. Proc. **564**, 200-208 (2001).

#### 1999

92. Yuri F. Orlov, Origin of quantum indeterminism and irreversibility of measurements. *Phys. Rev. Lett.* **82**, 243-246 (1999).

91. Yuri F. Orlov, Complementary histories and collapse into the past in standard quantum mechanics. *Int. J. Mod. Phys. B***13**, No. 20, 2629-2636 (1999).

90. Yuri F. Orlov, Quantum and classical Gödelian indeterminism, measurement, and informational collapse into the past. In Daniel Greenberger, Wolfgang L. Reiter and Anton Zeilinger, eds., *Epistemological and Experimental Perspectives on Quantum Physics. Proceedings of the International Symposium on Epistemological and Experimental Perspectives on Quantum Physics, Vienna, Austria, 3-6 September 1998* (Kluwer, London, 1999), pp. 89-102.

89. Yuri Orlov, Spin and beam dynamics. In K. Jungmann, H.-J. Kluge, I.B. Khriplovich, eds., *Proceedings of the Workshop on Nuclear Electric Dipole Moment Searches, GSI, Darmstadt, Germany, 9-10 November 1999*.

88. Yu. F. Orlov (for the Muon g-2 Collaboration), Spin and beam dynamics in the muon g-2 storage ring—systematic errors. In N.E. Tyurin *et al.*, eds., *Proceedings of the 13th International Symposium on High Energy Spin Physics, Protvino, Russia, 8-12 September 1998* (World Scientific, Singapore, 1999), pp. 509-511.

87. with R. Prigl *et al.* (Muon g-2 Collaboration), Status of the BNL muon (g-2) experiment. *IEEE Transactions on Instrumentation and Measurement* **48**, 182-185 (1999).

86. with R.M. Carey *et al.* (Muon g-2 Collaboration), New measurement of the anomalous magnetic moment of the positive muon. *Phys. Rev. Lett.* **82**, 1632-1635 (1999).

85. with L. Nodulman *et al.* (Muon g-2 Collaboration), Status of the new muon (g-2) experiment. In *Weak Interactions and Neutrinos. Proceedings of the 17th International Workshop on Weak Interactions and Neutrinos (WIN 90), Cape Town, South Africa, 24-30 January 1999* (Cape Town, 1999), pp. 28-32.

84. with M. Grosse Perdekamp *et al.* (Muon g-2 Collaboration), Status of the g-2 experiment at BNL. Presented at the 5th International Workshop on Tau Lepton Physics (TAU 98), Santander, Spain, 14-17 September 1998. *Nucl. Phys. B Proc. Suppl.* **76** (1999) 253-260.

83. with Y.K. Semertzidis *et al.* (Muon g-2 Collaboration), The muon (g-2) experiment at BNL. In *Probing Luminous and Dark Matter. Proceedings of the Conference on Probing Luminous and Dark Matter, Rochester, NY, 24-25 September 1999* (Rochester, 1999) pp. 72-89.

82. with K. Jungmann *et al.* (Muon g-2 Collaboration), A new measurement of the muon magnetic anomaly. In *Physics and detectors for DAPHNE. Proceedings of the 3rd Workshop on Physics and Detectors for DAPHNE (DAPHNE 99), Frascati, Italy, 16-19 November 1999* (Frascati, 1999), pp. 547-557.

#### 1998

81. with D.W. Hertzog *et al.* (Muon g-2 Collaboration), The new Brookhaven (g-2)(mu) experiment. In *Particles, Strings and Cosmology. Proceedings of the 6th International Symposium on Particles, Strings and Cosmology (PASCOS 98), Boston, MA, 22-27 March 1998* (Boston, 1998), pp. 186-197.

80. with R.M. Carey *et al.* (Muon g-2 Collaboration), The anomalous magnetic moment of the muon. In *Frontier Tests of QED and Physics of the Vacuum. Proceedings of the Workshop on Frontier Tests of Quantum Electrodynamics and Physics of the Vacuum, Sandanski, Bulgaria, 9-15 June 1998* (Sandanski, 1998), pp. 97-116.

79. with Y.Y. Lee *et al.* (Muon g-2 Collaboration), The muon g-2 storage ring magnet. In *Stockholm 1998, EPAC 98. Proceedings of the 6th European Particle Accelerator Conference (EPAC 98), Stockholm, Sweden, 22-26 June 1998* (Stockholm, 1998), pp. 1999-2001.

78. with C. Timmermans *et al.* (Muon g-2 Collaboration), A new measurement of the muon anomalous magnetic moment at BNL. In *High Energy Physics. Proceedings of the 29th International Conference on High-Energy Physics (ICHEP 98), Vancouver, British Columbia, Canada, 23-29 July 1998* (Vancouver, 1998), vol. 1, pp. 550-554.

## Reports, e-prints and proposals

### 2015

154. Yuri Orlov, Spin coherence time analytical estimations. arXiv:1506.02069. 5 June 2015.

153. Yuri Orlov, Confirmation of some formulas related to spin coherence time. arXiv:1504.07304, 27 April 2015. (Same as #144, below.)

152. with E. M. Metodiev *et al.*, Analytical Benchmarks for Precision Particle Tracking in Electric and Magnetic Rings. arXiv:1503.02247, 8 March 2015.

151. with V. Anastassopoulos *et al.* (EDM Collaboration), A storage ring experiment to detect a proton electric dipole moment. arXiv:1502.04317, 15 February 2015.

### 2014

150. In a purely electric ring, with all particles having magic momentum, spin resonances cannot imitate EDM. Unnumbered EDM Note (8 June 2014).

149. A formula for SCT. Unnumbered EDM Note (1 June 2014).

148. Cancellation of the RF magnetic gradient  $\partial B_x / \partial y$ . (Unnumbered EDM Note, 7 April 14; slightly revised and formula (31) added, 15 April 2014.)

147. On the RF radial magnetic field. Unnumbered EDM Note (17 February 2014).

### 2013

146. with Yannis K. Semertzidis, Modulating the vertical magnetic field cannot produce a measurable EDM signal. Unnumbered EDM Note (21 August 2013).

145. On chromaticity, orbit lengthening, and pitch effects in magnetic rings. Unnumbered EDM Note (10 March 2013).

144. Some remarks on the  $m = 0$  case. Unnumbered EDM Note (17 February 2013).

143. My Trento talk, "Spin coherence time analytical estimations": some details. Unnumbered EDM Note (23 January 2013).

2012

142. Spin coherence time analytical estimations. Workshop, EDM Searches at Storage Rings, ECT Trento, Italy, 4 October 2012.

141. Report on Yuri Orlov, Eanna Flanagan and Yannis Semertzidis, "Spin rotation by Earth's gravitational field in a 'frozen-spin' ring." Workshop, EDM Searches at Storage Rings, ECT Trento, Italy, 5 October 2012.

140. On lengthening in the SCT experiment. Unnumbered EDM Note (2 August 2012).

139. On the partially-frozen-spin method. Unnumbered EDM Note (21 March 2012).

2011

138. with V. Anastassopoulos *et al.*, A proposal to measure the proton electric dipole moment with  $10^{-29}$  e · cm sensitivity. Submitted by the EDM Collaboration to DOE NP (November 2011).

137. Explanation of the YS-effect. Unnumbered EDM Note (23 June 2011).

136. Comment on Bill Morse's 23 June 2011 Note "Off-Momentum Closed Orbit." Unnumbered EDM Note (23 June 2011).

135. On the virial theorem and spin rotations. Unnumbered EDM Note (13 June 2011).

134. On spin rotation. Unnumbered EDM Note (18 June 2011).

2010

133. Weak X-focusing, strong Y-focusing triplets. Unnumbered EDM Note (27 September 2010).

132. Electric ring: SCT. Unnumbered EDM Note (27 September 2010).

131. A design of an electric pEDM ring, taking into account a B(R) perturbation. Unnumbered EDM Note (29 May 2010).

2009

130. with R.M. Carey *et al.*, A new (g-2) experiment: A proposal to measure the muon anomalous magnetic moment to  $\pm 0.14$  ppm precision. Fermilab proposal 0989 (February 2009).

129. A CW-CCW symmetric lattice for the proton EDM experiment. Unnumbered EDM Note (29 November 2009).

128. Simulations and measurements for SCT. Unnumbered EDM Note (30 November 2009).

127. About the correct lattice for an EDM ring with two simultaneous CW and CCW beams. Unnumbered EDM Note (25 October 2009).

126. Spin decoherence and the BMT equations. Unnumbered EDM Note (20 September 2009).

125. Fields and Lorentz equations in the ideal proton EDM ring. Stage I. Unnumbered EDM Note (12 July 2009).

124. Pre-review of the EDM Collaboration Plan: Additional Notes. I. Including acceleration by the radial E-field in simulations. Unnumbered EDM Note (26 June 2009).

123. Using BMT equations to analyze spin decoherence and resonances. Unnumbered EDM Note (22 June 2009; 2 August 2009).

122. The direct influence of the earth's gravitational field on spin (a general relativity effect). Unnumbered EDM Note (17 June 2009).

121. Spin Coherence Time (SCT), V. The estimated normal co-ordinates in the proton EDM ring. Unnumbered EDM Note (16 June 2009).

120. Solutions to the  $x^2 - y^2$  separation problem. Remarks on the William Morse Note "SCT Lattice" of 2/20/09). Unnumbered EDM Note (1 March 2009).

## 2008

119. Comparison of current simulations with old analytical predictions. Unnumbered EDM Note (12 October 2008).

118. Physical and geometrical phases. Unnumbered EDM Note (18 September 2008).

117. Some details of the EDM ring. Unnumbered EDM Note (6 August 2008).

116. All simulations of the azimuthally homogeneous ring are correct (so far): 1. Unnumbered EDM Note (2 August 2008).

115. EDM Note 10 (The main theoretical aspects of spin dynamics in the muon EDM experiment) revised. Unnumbered EDM Note (28 June 2008).

114. Spin Coherence Time (SCT), IV. The normal co-ordinates. Unnumbered EDM Note (22 June 2008)

113. Spin Coherence Time (SCT), III. Preliminary approximate values of the 12 SCT parameters. Unnumbered EDM Note (18 June 2008).

112. Spin Coherence Time (SCT), II. What needs to be "measured" by SCT simulations, and in what order. Unnumbered EDM Note (14 June 2008).

111. Spin Coherence Time (SCT), I. Using normal co-ordinates in the analysis of SCT. Unnumbered EDM Note (2 June 2008).

110. with A. Anastassopoulos *et al.*, AGS Proposal: Search for a permanent electric dipole moment of the deuteron nucleus at the  $10^{-29}$  e·cm level (April, 2008).

109. Questions on some ring versions. Unnumbered EDM Note (25 March 2008).

108. On the contribution of vertical oscillations to spin decoherence. Unnumbered EDM Note (2 March 2008).

107. Analysis of the Bill Morse example regarding spin coherence time. Unnumbered EDM Note (23 February 2008).

106. Systematics caused by temperature gradients in materials used in the frozen spin EDM method. Unnumbered EDM Note (19 January 2008).

## 2007

105. Spin resonance systematics in a storage ring for the resonance method of EDM measurement: a new method for canceling most parasitic spin resonances. Unnumbered EDM Note (28 March 2007).

104. The EDM ring-detector without parasitic spin resonances linked to the vertical betatron oscillations. Unnumbered EDM Note (16 March 2007).

103. A possible "one shot" cancellation of all parasitic spin resonances coupled to vertical beam oscillations in the EDM storage ring experiment. Presented at the EDM Collaboration Meeting, Brookhaven National Laboratory, 5 March 2007.

102. with the Storage Ring EDM Collaboration, Deuteron EDM Systematic Error Study Plan (March 2007).

101. A plan for canceling systematic errors caused by spin resonances. Unnumbered EDM Note (7 February 2007).

## 2006

100. Systematic errors caused by spin resonances. Unnumbered EDM Note (16 November 2006).

99. with M. Bai *et al.*, LOI, Development of a resonance method to search for a deuteron electric dipole moment using a charged particle storage ring (August 2006).

98. W.M. Morse, Y.F. Orlov, and Y.K. Semertzidis, Corrections of systematic errors in the two sub-beam technique of resonance EDM measurement. Unnumbered EDM Note (May 2006).

97. A solution to the problem of getting long spin coherent times for both beams of the resonance EDM ring design. Unnumbered EDM Note (2 February 2006).

## 2005

96. An EDM spin resonance ring with minimized spin resonance perturbations. EDM Note 88 (17 September 2005).

95. Remarks on a future feedback system preserving the equality  $\omega_r = \omega_a$ . EDM Note 86 (7 September 2005).

94. On tensor electric polarizability in the BMT equations. EDM Note 91 (6 September 2005).

93. An RF system producing  $dv/dt$  oscillating in resonance with g-2 rotations. "Linear" version. EDM Note 83 (24 August 2005, revised 7 September 2005).

92. Using resonance between magnetic moment rotations and velocity oscillations to measure electric dipole moment. Unnumbered EDM Note (21 July 2005).

91. Corrections of the first-order false EDM signal in the EDM resonance ring. EDM Note 76 (May, 2005).

90. Vertical spin precession due to quadrupole and quadrupole-like interactions in the resonance EDM ring. EDM Note 79 (May, 2005).

89. CW/CCW technique in the resonance method of EDM measurement. EDM Note 73 (January, 2005).

88. B-field oscillations in the resonance EDM ring. Non-existence of first order spin-resonance perturbations in the RF cavities. EDM Note 74 (January, 2005).

## 2004

87. The resonance method of EDM measurement. 4. Synchrotron parameters. EDM Note 72 (December, 2004).

86. The resonance method of EDM measurement. 3. Betatron parameters. EDM Note 71 (December, 2004).

85. The resonance method of EDM measurement. 2. Zero dispersion function. EDM Note

70 (November, 2004).

84. The resonance method of edm measurements in storage rings: conceptual design. EDM Note 69 (October, 2004).

83. with M. Aoki *et al.*, Deuteron EDM proposal: search for a permanent deuteron electric dipole moment at the  $10^{-27}$  e · cm level. (August, 2004).

82. Principal scheme of a deuteron EDM ring with a long spin coherence time. (Cancellation of the second-order perturbations in  $\Delta\omega_a$ .) EDM Note 61 (February, 2004).

### 2003

81. Changes of muon betatron amplitudes during their lifetime as a possible source of a small g-2 error. EDM Note 59 and g-2 Note 440 (4 November 2003).

80. W. M. Morse, Y. F. Orlov and Y. K. Semertzidis, Cancellation of the "twist and "saucer" effects by using the CW and CCW injections. EDM Note 62 (November 2003).

79. Correction of the  $E_v$  field in the deuteron EDM experiment by the trapping into resonance method. EDM Note 43 (21 July 2003).

78. J. Paley, C. Polly, W. Morse and Y. Orlov, Why were the muon losses higher in the low n than the high n 2001 data? g-2 Note 433 (30 April 2003).

77. Spin rotations around the longitudinal axis due to correlation  $\omega_R \delta\omega_a \sin\varphi$ . EDM Note No. 35 (31 January 2003).

76. EDM perturbations caused by a  $\Delta p/p$  spread. EDM Note No. 36 (29 January 2003).

75. Yuri F. Orlov and Yannis K. Semertzidis, To get rid of CBO (and to get scraping without resonance crossings). EDM Note 32 (21 January 2003) and g-2 Note 431 (23 January 2003).

74. Vertical spin rotation caused by the correlation  $\langle \theta_H(s) B_L(s) \rangle$ . Muon EDM Note No. 34 (23 January 2003).

73. Which equations do not follow from BMT equations? EDM Note 33 (22 January 2003).

72. with A Silenko, *et al.* (EDM Collaboration), J-PARC Letter of Intent. Search for a permanent muon electric dipole moment at the  $10^{-24}$  e · cm level (9 January 2003).

### 2002

71. Y. Orlov, M. Diele, W.M. Morse, C.S. Ozben, and Y. K. Semertzidis, Results with the jumping windows method. Muon g-2 Note No. 411 (10 June 2002).

70. In the EDM experiment, the radial electric field must compensate the vertical magnetic field locally, not on the average. EDM Note 26 (5 December 2002).

### 2001

69. Main formulas and numbers related to the g-2 beam and spin resonances. Muon g-2 Note 396 (6 June 2001).

68. Yuri Orlov, Cenap S. Ozben, and Yannis K. Semertzidis, Muon revolution frequency distribution from a partial-time Fourier transform of the g-2 signal in the Muon g-2 Experiment. Muon g-2 Note 392 (1 May 2001).

67. Observational spin resonances in the BNL g-2 experiment (the James Miller, Robert Carey, Long Duong effect vs. the usual CBO effect). Muon g-2 Note 386 (28 February 2001).

66. Physical spin resonances in the BNL g-2 experiment. Muon g-2 Note 384 (24 January 2001).

65. The possible parameters of the RF systems for the muon EDM experiment (preliminary estimates). EDM Note 18 (30 November 2001).

64. Spin resonance method of the EDM measurements. EDM Note 15 (16 August 2001) and g-2 Note 399 (5 September 2001).

### 2000

63. Yuri Orlov and Cenap Ozben, It is possible (and necessary) to know about muon momentum distributions at different times after injection. Note prepared for g-2 Collaboration meeting, University of Illinois at Urbana-Champaign, 14-15 July 2000.

62. Why a change of the n-value will not decrease the influence of coherent radial oscillations, and a remark about the fit. *Ibid.*

61. Yuri Orlov, Cenap S. Ozben, Yannis K. Semertzidis, Fourier analysis for the g-2 fast rotation data. Muon g-2 Note 364 (15 May 2000).

60. About the influence of coherent radial oscillations. Muon g-2 Note 359 (16 May 2000).

59. with Y.K. Semertzidis *et al.*, Sensitive search for a permanent muon electric dipole moment. EDM Note 13 (April 2000).

58. The possibility of precise measurements of the  $E_V$ -field using trapping into resonance. EDM Note 12 (18 March 2000).

57. with R. Carey, *et al.*, AGS Letter of Intent—Search for a permanent muon electric dipole moment ( 7 February 2000).

56. The main theoretical aspects of spin dynamics in the muon EDM experiment. EDM Note 10 (January, 2000; revised 28 June 2008).

#### 1999

55. Complementary histories, collapse into the past, and EPR 'nonlocality' in standard quantum mechanics. CLNS-99-1616 (1999).

54. A radical solution to the E-field correction problem. Muon g-2 Note 203 (July 1999).

53. Perturbation of the observed (g-2) signal by coherent radial betatron oscillations. (The physics revised.) Muon g-2 Note 341 (4 June 1999). *Proceedings, g-2 Collaboration Meeting, Heidelberg, 8-9 June 1999*, pp. 523-532.

52. Some rules for binning. Muon g-2 Note 336 (1 March 1999).

51. Beam dynamics during quadrupole scraping. Muon g-2 Note 335 (25 January 1999).

50. Fourier analysis for the muon momentum distribution beginning at any late time: Why Yannis [Semertzidis'] approach is correct. Muon g-2 Note 337 (25 January 1999).

49. How to calculate the average deviations  $\left\langle \frac{\Delta p}{p} \right\rangle$ ,  $\langle \theta_x \rangle$ ,  $\langle \theta_y \rangle$  and other data using fiber beam monitors. Muon g-2 Note 338 (25 January 1999).

#### 1998

48. Perturbation of the observed (g-2) signal by coherent radial betatron oscillations. Unnumbered Muon g-2 Note (28 December 1998).

47. Investigation of the logical-linguistic origins of quantum mechanics: a possible cognitive experiment, University of Bergen, Norway, Center for the Study of the Sciences and the Humanities, Working Paper 4/1998.

46. Origins and meaning of peculiarities of quantum mechanics: a semantic interpretation, University of Bergen, Norway, Center for the Study of the Sciences and the Humanities, Working Paper 5/1998.

45. The origin of quantum indeterminism and irreversibility of measurements, CLNS-98-1558 (1998).

44. The difference between a measuring apparatus and a target, CLNS-98-1559 (1998).

43. Yuri F. Orlov (for the g-2 Collaboration), Spin and beam dynamics in the muon g-2 storage ring: systematic errors, CLNS-98-1588 (1998).

1997

42. with R. Carey *et al.*, AGS Letter of Intent—Search for an electric dipole moment of muon at the  $10^{-24}$  e·cm level. Muon EDM Note No. 4 (October 1997).

41. Spin and beam dynamics. II. Muon g-2 Note 290 (21 August 1997).

40. Redefinitions of histories by measurements. An explanation of "nonlocality" observed in EPR-Bohm experiments, CLNS-97-1475 (May 1997).

39. Quantum-type coherence as a combination of symmetry and semantics, CLNS-97-1476 (May 1997).

38. Measurement of beam parameters  $\langle \theta_z^2 \rangle$ ,  $\left\langle \frac{\delta p}{p} \right\rangle$  and  $\left\langle \left( \frac{\delta p}{p} \right)^2 \right\rangle$  using traceback system

and fiber beam monitors, Muon g-2 Note 284 (17 February 1997).

1996

37. Spin and beam dynamics. I. Muon g-2 Note 279 (28 December 1996).

36. Peculiarities of quantum mechanics: origins and meaning, CLNS-96-1443 (1996). (Revised version of CLNS-96-1399.) Prepared for the Nordic Symposium on Basic Problems in Quantum Physics, Rosendal Barony, Hardanger, Norway, 4-10 June 1997.

35. Possibilities of experimental proof of the logical-linguistic origins of quantum mechanics. CLNS-96-1439 (1996).

1995

34. Helical separation of  $e^+e^-$  beams: (x-y) coupling and vertical dispersion, CLNS-95-1344 (27 July 1995).

33. How Fourier analysis of the electron decay signal works. Muon g-2 Addendum to Note 241 (October 1995).

32. Remarks on Note 241: How to measure muon momentum distributions at late times. Muon g-2 Note 241 (September 1995).

1994

31. A radical solution to the E-field correction problem. Muon g-2 Note 203 (July 1994).

1993

30. The logical origins of quantum mechanics, CLNS-93-1208 (1993).

1992

29. Yuri Orlov and A. Soffer, Fourier analysis of high order coherent and incoherent resonances in beam-beam interaction, I. Incoherent spectroscopy, CLNS-92-1178 (1992).

28. Y.F. Orlov and A. Soffer, Precise Measurement of Muon Momentum Distribution Using Fourier Analysis of Decay-Electrons. Muon g-2 Note 128 (October 1992).

1991

27. Compensating for the crossing angle without crab and RF cavities, CLNS-91-1062 (1991).

26. Y.F. Orlov and A. Soffer, Precise measurement of muon momentum distribution in the muon (g-2) experiment. CLNS-91-1063 (1991).
